Application number: JP19980334880 19981020
Priority number(s):

Abstract of JP2000192396

PROBLEM TO BE SOLVED: To obtain inexpensive disposable sanitary paper and sanitary sheet and provide a method for producing the same.

SOLUTION: This sanitary paper is formed of dried material of coffee solution extract residual waste fluid or dried material of immersed solution of coffee solution extract residue or thin paper containing a mixture of these dried materials. This sanitary sheet is equipped with a water permeable nonwoven fabric layer part forming the upper face, an impermeable film layer part made of plastic forming the lower surface, a water-absorbing first paper layer part located in contact with the lower surface of the nonwoven fabric layer part, a water-absorbing layer part containing a water-absorbing resin and water-absorbing material powder and located in contact with the lower surface of the first paper layer part and water-absorbing second paper layer part located in contact with the lower surface of the water-absorbing layer part, and the impermeable film layer part is arranged in contact with the lower position of the second paper layer and formed of thin paper containing a mixture of dried material of coffee solution extraction residual waste fluid or dried material of immersed liquid of coffee solution extraction residue or a mixture of these dried materials.
